BIOGRAPHY

Arne Steinberg is a Frankfurt-based electronic music producer, DJ, and label owner whose unmistakable sound has cemented his status in the electronic music scene. Known for his deep, hypnotic rhythms and seamless fusion of cross-genre influences, he crafts immersive sets and productions that resonate with both underground purists and forward-thinking audiences.

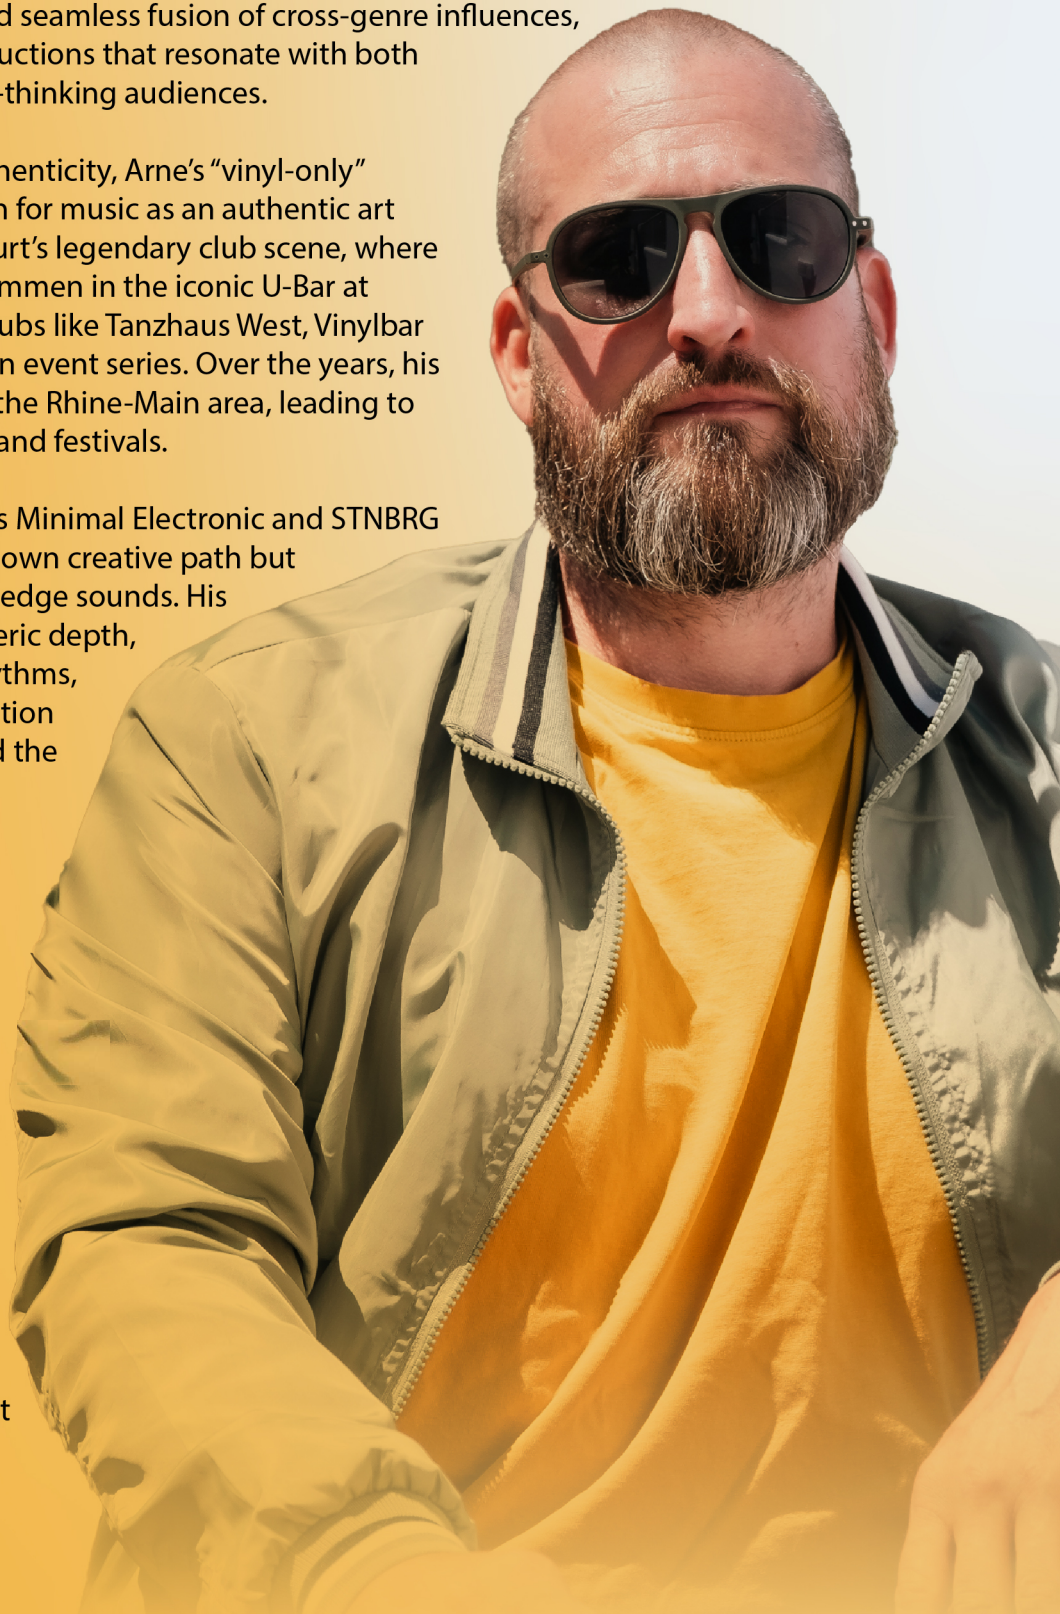

A staunch advocate of analog authenticity, Arne's "vinyl-only" approach reflects his deep passion for music as an authentic art form. His journey began in Frankfurt's legendary club scene, where he became a resident at Runterkommen in the iconic U-Bar at U60311. He was also resident in clubs like Tanzhaus West, Vinylbar and others, later launching his own event series. Over the years, his reputation has extended beyond the Rhine-Main area, leading to performances at renowned clubs and festivals.

As the owner and CEO of his labels Minimal Electronic and STNBRG Records, Arne not only shapes his own creative path but also fosters a platform for cutting-edge sounds. His productions, marked by atmospheric depth, driving basslines, and intricate rhythms, blend minimal techno's sophistication with the groove of tech house and the warmth of Latin influences.

His latest releases on the well-known label Whats Poppin exemplify his ability to craft evocative soundscapes with minimalist elegance. The track „Cape Town“ is a collab with the Berlin-based DJ and producer duo AkaAka and unfolds with subtle complexity, blending deep house textures with refined electronic elements. With gentle melodies, intricate rhythms, and an introspective tone, the track balances emotion and technical precision, offering a meditative yet immersive experience while reinforcing Arne's reputation for seamlessly merging depth and dancefloor energy.

Driven by an unwavering commitment to musical evolution, Arne Steinberg continues to push boundaries—whether through his meticulously curated DJ sets, his innovative studio work, or the artistic direction of his label and his work. His ability to fuse hypnotic rhythms, melodic hooks, and deep, resonant basslines makes him a distinctive and influential figure in contemporary electronic music.

Now he is currently working on his first album for release in 2026. It will be a journey through electronic music and include tracks from various genres, reflecting his musical style from house to techno. There will also be remixes by well-known colleagues such as Tonis Rios, Chris Wach & Paal12, Reiner Liwenc, Electroblaze and Roque.
